R.O.C.B No. 546/37.

Station Madras, *Dated the* 16th July 1937

From (Name) M.R.RY. RAO BAHADUR D. ANANDA RAO GARU, B.Sc.,

(Designation) Director of Agriculture

To The Secretary to the Government of Madras,

Development Department.

Sir,

Panchami 1921
Cir. B 29.

I have the honour to bring to your notice that an old Crude oil engine which was in use at the Agricultural Research Station, Hagari for pumping water for irrigation purposes has gone out of order. Attempts to get it repaired have proved unsuccessful, as the engine is stated to be of an obsolete type and as no spare parts are available in India.

2. The Chief Engineer for Electricity, whose advice was-

was sought for with reference to G.O. No. 1809, Public Works Department (Electricity) dated the 3rd August, 1936 in regard to the purchase of a new engine, suggests that a second hand engine may be purchased in view of the possibility of an electric supply in the vicinity in about a year or so. As crops are already reported to be drying in the irrigated area and as an engine is urgently required, I have directed the Deputy Director of Agriculture, III Circle to arrange for the purchase of a second hand engine and to report the cost. As its purchase requires sanction of Government, I request that Government may be pleased to approve my action. The cost of the engine will be reported to Government in due course and their sanction sought for.

I have the honour to be,

Sir,

Your most obedient servant,

K. J. Adv
